Introduction

In 1980 the North Carolina Archaeological Council published a bibliography of archaeological papers on file with one of its member institutions. Appearing as Publication 13 in the Council Series, "A guide to research papers in the archaeology of North Carolina on file with the Archaeology Branch of the North Carolina Division of Archives and History" provided a list of 661 works to those involved with archaeological research or resource management. Most of these works, which cover archaeological projects throughout the state, were unpublished. In 1981, "Addendum I: A guide to research papers in the archaeology of North Carolina on file with the Archaeology Branch of the North Carolina Division of Archives and History" was printed as Publication 14 in the Council Series. Since the publication of those bibliographies, the Archaeology Branch's file of dissertations, theses, articles, and contract reports on archaeology has continued to grow. In addition, many of the major sources of published archaeological works in North Carolina have been indexed for use in environmental review at the branch. As a result, the number of additional references has led to the compilation of a third bibliography.

As in the preceding bibliographies, the works listed here represent a wide variety of research interests, techniques, formats, and purposes. The geographical focus varies from excavations of single structures or surveys of one-acre plots of land to overviews of physiographic regions that include one-third of the state. The scale of reporting ranges from brief reports used to clear small earth-moving projects with an absence of archaeological sites to short articles in archaeological and historical society newsletters to reports of large-scale river basin surveys and major excavations, Ph.D. dissertations, master's theses, and published works with wide distribution.

In each citation the compiler has attempted to include the name of the institution or agency that performed the work described in the report. When a performing agency is not listed in the report, the sponsoring or contracting agency (if known) is listed in its place. This reference is intended to supply the researcher with the information needed to contact directly the individuals or the institutions that have on file not only the manuscript cited, but also (presumably) the notes, photographs, and artifacts produced by the project in question. In most cases a researcher interested in past work in a particular area will not need to refer to the Archaeology Branch files.

This bibliography uses the format prescribed by American Antiquity (Style Guide for American Antiquity 1979). The body of the list has been arranged alphabetically by the first author listed in the report, or by principal investigator or sponsoring institution if no author was listed on the Archaeology Branch copy. An index of works arranged by county or region (when the entry deals with several counties) follows the author index. The numbers listed next to each county or region refer to the numbers found to the right of each title in the author index. Style variants such as the spellings of archeology and archaeology have been maintained. To prevent redundancy, the addresses of most of the contributing organizations have been abbreviated in individual entries. A list of these organizations appears in the appendix. Where report titles do not mention the North Carolina counties (or regions) involved, county names or regions have been added in brackets.
